1 INTRODUCTION

Héritage automobile was founded by Nicolas A. Cuche-Curti. He holds a doctorate in monetary economics and is a former central banker. To pursue and share his passion for classic motor cars, he took early retirement. Now he is a workshop owner and consultant with heart, soul, and mind.

He has been interested in classic motor cars since childhood and has devoted a large part of his free time to them ever since. As a result, he has extensive experience and in-depth knowledge in this field. His collection includes several rare vehicles, which he maintains and cares for himself.

Nicolas has been building up an extensive network of contacts and collectors throughout Europe and the United States. His collection also includes a wide variety of documentation on classic motor cars. As a longtime enthusiast, he is an active member of several clubs.

Héritage automobile sells cars, but not on behalf of customers. The cars are part of our collection. So we guarantee high-quality maintenance. We usually sell when we need space for new acquisitions.

2 WORKSHOP

The workshop reflects our passion for classic motor cars. It is designed with the needs of our collection in mind. It also helps us provide our services.

On the ground floor, there is generous space for maintenance. We use a hydraulic lift to work on the cars. The high ceiling also creates a sense of openness and a comfortable work environment. Climate control keeps the workshop dry and warm year-round. Warm lighting illuminates the entire space and enhances the workshop's clean, refined look.

On the first floor, there is a lounge area, where comfortable seating and a refreshment station create a welcoming atmosphere for visitors. There is

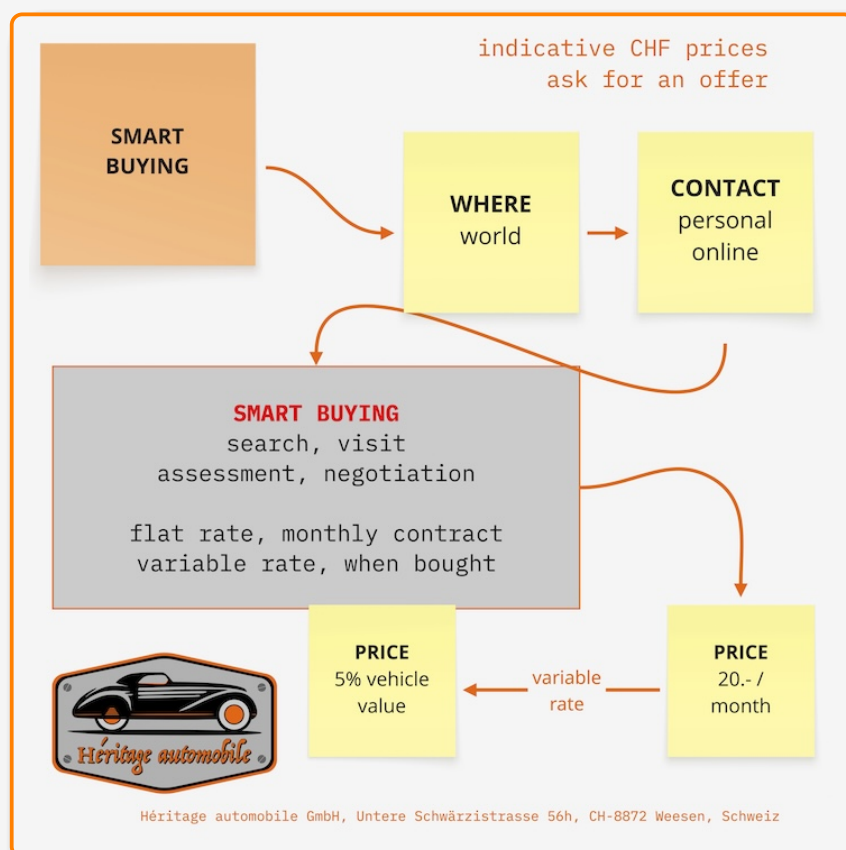

also an office for administrative tasks and a library. Although the business is run paperlessly, we store essential automotive documentation and books.

3 SERVICES

Our services are offered in simple formulas. Prices are indicative, ask for an offer. General conditions, available on H ritage automobile's website, apply for all services.

3.1 Smart Buying

Smart Buying

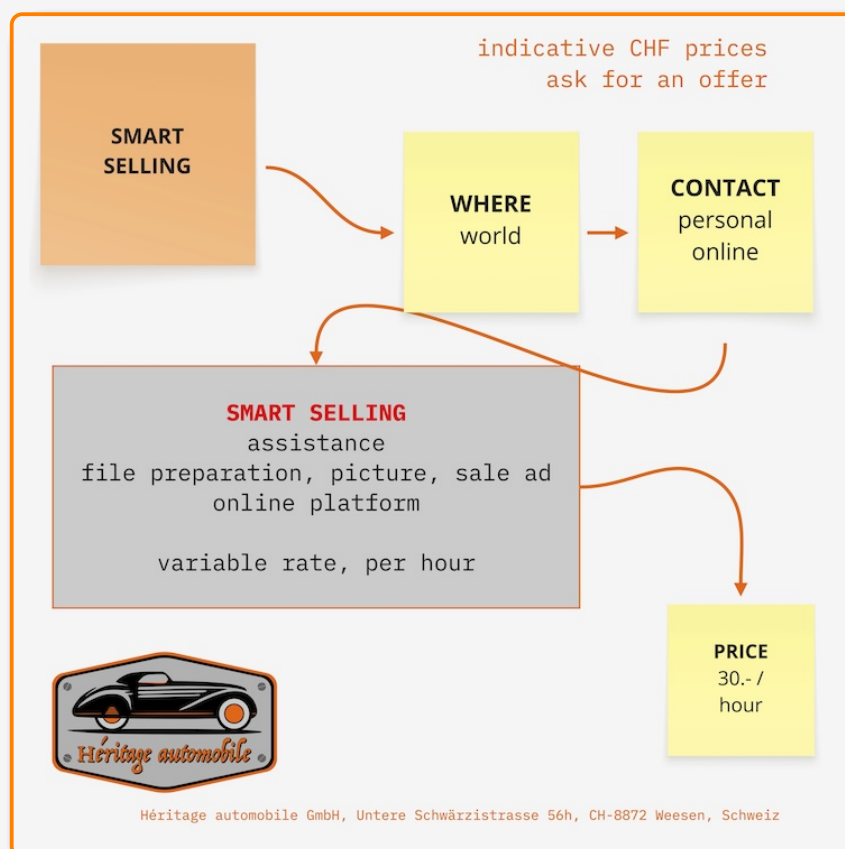

Whether you are a first-time buyer or a seasoned enthusiast looking to expand your collection, we help you find the right car that fits your taste and budget.

Our Smart Buying service covers the whole buying process from identifying the wanted cars to negotiating prices. We personally accompany prospective buyers to sellers, dealerships, and auctions offering hands-on assistance.

3.2 Smart Selling

Smart Selling

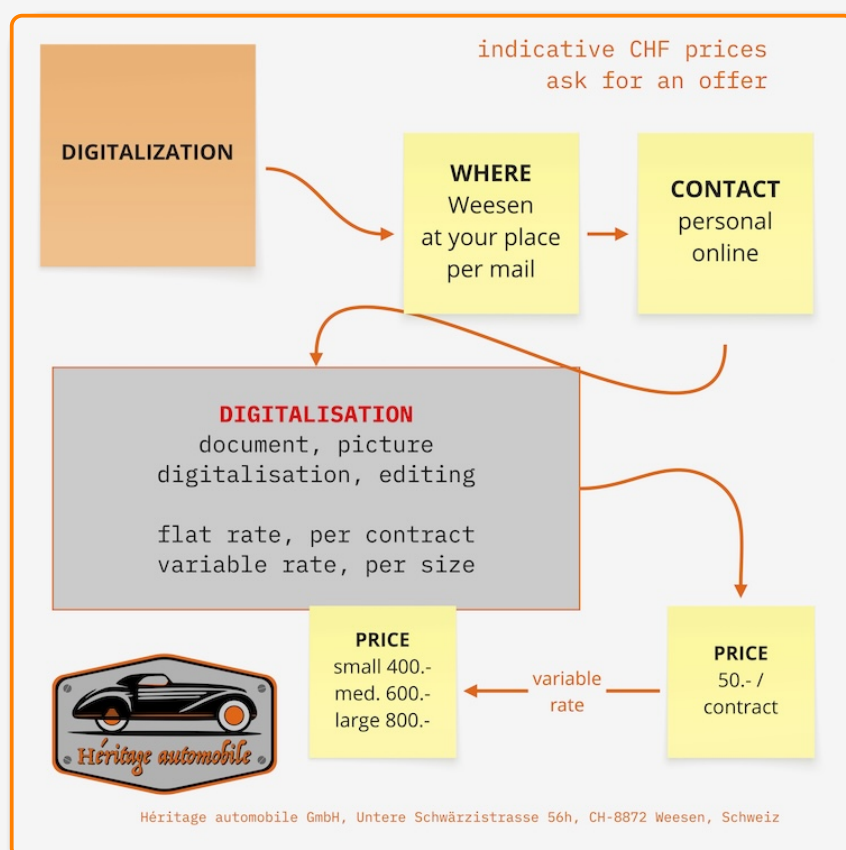

Whether you are selling a single classic motor car or part of a collection, we help you present your vehicle professionally to attract the right buyers.

Our Smart Selling service covers every step of the preparation process, from organizing documentation and creating digital vehicle files to writing ads with correct pictures and advising on pricing and presentation. We help ensure your car is showcased with accuracy and maximum appeal, while you remain in full control of the sale.

3.3 Digitalisation

Digitalization

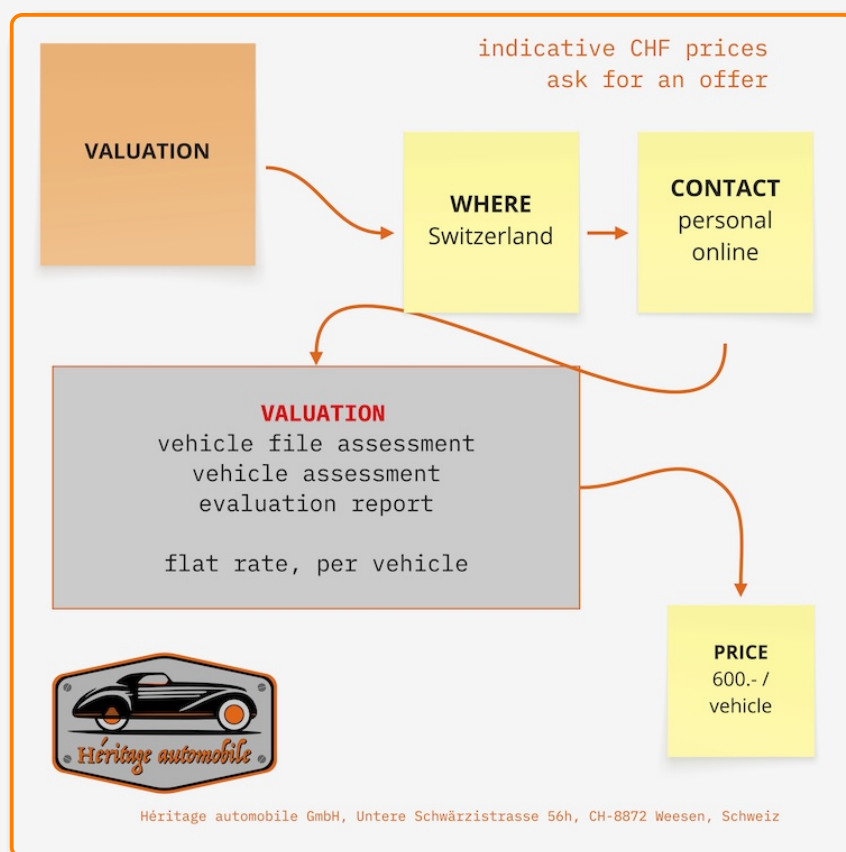

A dedicated digital file for each vehicle saves time, reduces paperwork, and keeps all your records secure, organized, and easy to search. It also makes it faster and easier to share information and communicate online with buyers, insurers, garages, or authorities whenever needed.

We simplify vehicle management through our Digitization service, converting your physical documents and photos into well-organized digital files in any format.

3.4 Valuation

Valuation

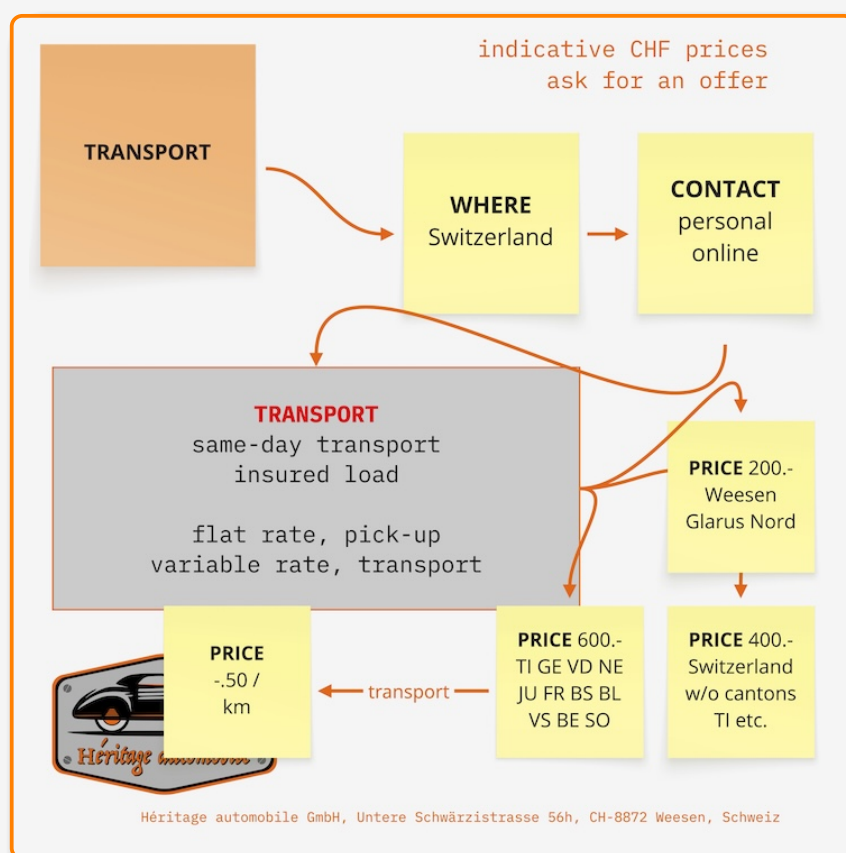

As the classic motor car market constantly evolves, a valuation reflecting today's reality can be useful for sale, purchase, insurance, or estate planning.

Our Valuation service ensures a thorough analysis and a reliable estimate of the vehicle's value, reviewing every aspect of the car and roughly 100 key points. The valuation is summarized in a detailed report.

3.5 Transport

Transport

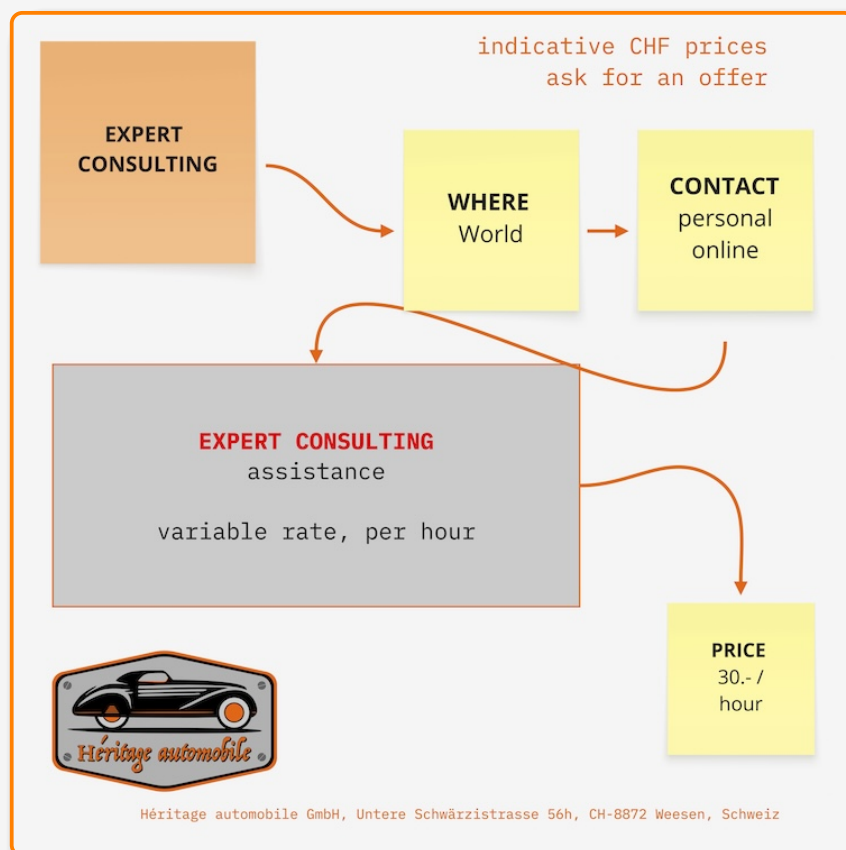

Transporting classic motor cars requires professionalism, flexibility, and uncompromising reliability, ensuring that your vehicle reaches its destination safely and without complications.

Our Transport service accounts for both the pickup cost, charged at a flat rate based on the pickup location, and the transport itself, charged at a variable rate according to the distance traveled.

Our trailer is an open, two-axle T4 Brian James with long access ramps, capable of handling loads up to 2500 kg (total 3500 kg). The tow vehicle is a 21 Ford Ranger.

3.6 Expert Consulting

Expert Consulting

We offer Expert Consulting on a wide range of classic motor car topics, tailored to the specific needs of collectors, owners, investors, and enthusiasts.
