1 GARAGE

Our garage reflects our passion for classic motor cars. It is designed with the needs of our own classic motor car collection in mind, offering a perfect balance of functionality and aesthetic.

On the ground floor, the garage has different zones set up for specific tasks. There are a generous space for maintenance and a section for storing tools.

With ample vertical space, we use a hydraulic lift to work efficiently on the undercarriage of cars. The high ceiling also contributes to a sense of openness, creating a comfortable work environment.

Climate control keeps the garage dry and warm year-round, ideal for preserving the cars. Warm lighting illuminates the entire space, highlighting key areas like the workbenches and the lift. This not only provides functional lighting but also enhances the garage's clean look.

On the first floor, the garage features a lounge area for meeting visitors, clients, and friends. Comfortable seating, a sleek coffee table, and a small refreshment station create a welcoming atmosphere to enjoy the company of fellow enthusiasts.

Beside the lounge, there are a library and an office for all administrative tasks. Although the business is run paperless, we store original automotive documentation and books. Walls are adorned with artwork and vintage memorabilia, giving the place a personal touch.

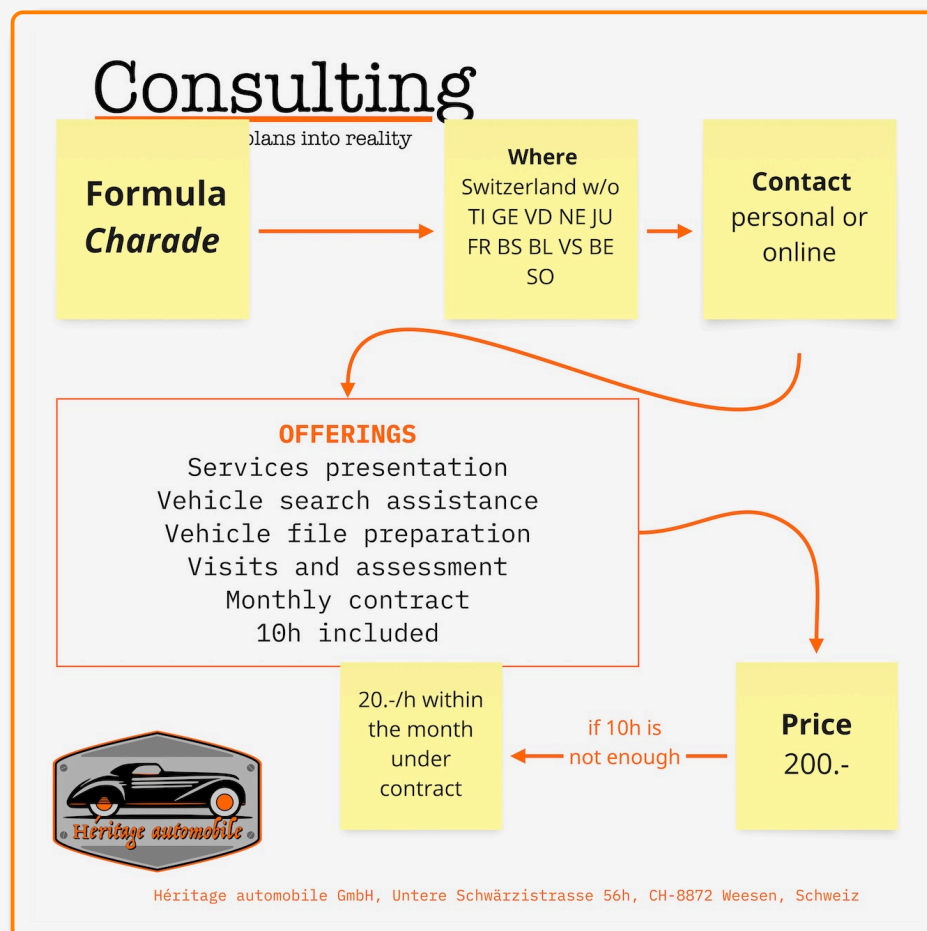

1.1 Formula *Lignières*

Our services are offered in simple, transparent formulas at attractive prices. General terms and conditions apply (see separate document in German).

The formula *Lignières* consists of an initial contact to get to know each other and to take stock of your project. It is free and without contractual obligation, and can take place in our lounge in Weesen or online.

2 CONSULTING

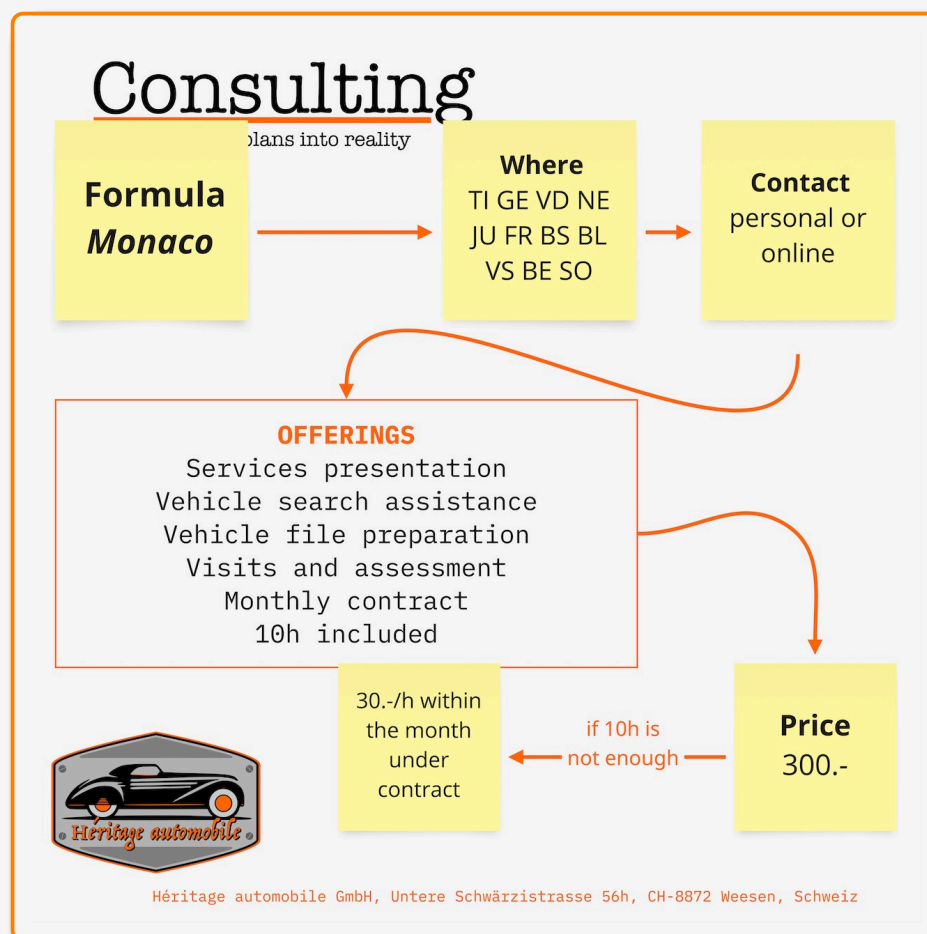

Navigating the world of classic motor cars can be overwhelming and time-consuming. Our consulting service provides personalized guidance to help you make confident decisions when purchasing a car. Whether you are a first-time buyer or a seasoned enthusiast looking to expand your collection, we help you find the right car that fits your taste and budget.

The basic rule is quite simple: never buy a classic motor car alone. You

should be with somebody to inspect both the car and the seller. Four eyes, four ears, two noses, and two mouths are the minimum equipment to buy a classic motor car.

Our consulting service covers the whole buying process from identifying the desirable cars to visiting dealerships, conducting thorough inspections, and negotiating prices. We personally accompany prospective buyers to dealerships or auctions offering hands-on assistance.

2.1 Formula *Charade* and *Monaco*

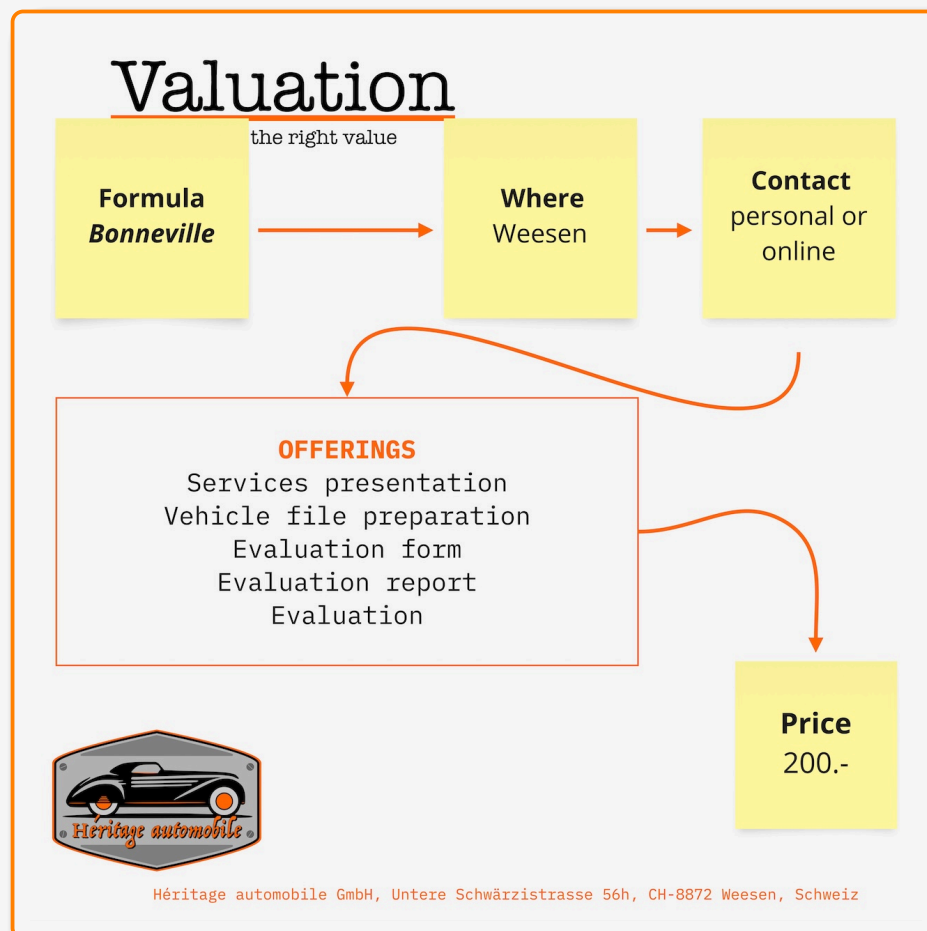

Our services are offered in simple, transparent formulas at attractive prices. General terms and conditions apply (see separate document in German).

Two formulas are available, depending on both your location and the one of the vehicle you look for. The formula *Charade* covers a large part of German-speaking Switzerland. The formula *Monaco* covers the rest of Switzerland, including Romandie and Ticino.

3 VALUATION

Finding the right value of a classic motor car is sometimes more sorcery than analysis. Anyway, with or without the gods, there is a market with demand and supply, and therefore with a market price. Accurately assessing the value of a car requires a deep understanding of the market and the unique qualities that contribute to a car's value.

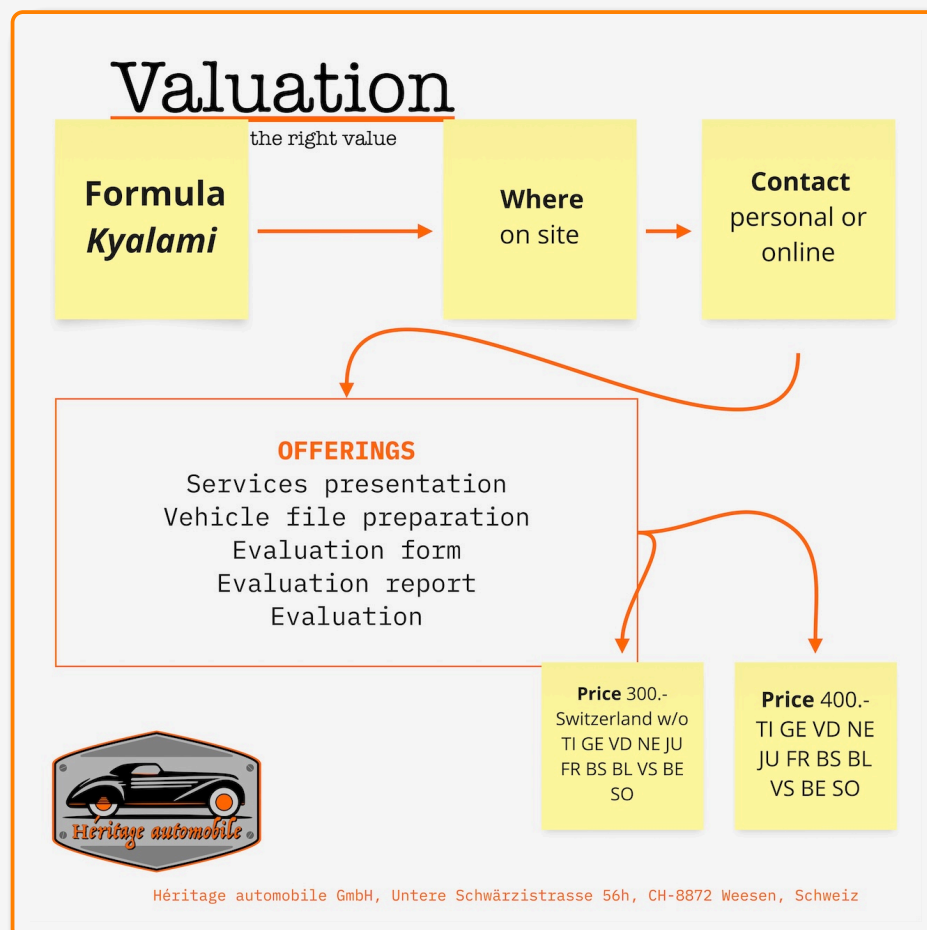

Our valuation service offers a comprehensive analysis, ensuring that you have a precise and reliable estimate of your vehicle's value. Whether you are looking to buy, sell, insure, or simply assess your car's value for personal records, we provide unbiased, expert opinions.

We take a thorough approach, reviewing every aspect of the car, focusing on around 100 different points. Our valuations are backed by our experience, a deep understanding of the market, and a keen eye for all the details that can make a difference. We give you an accurate, professional valuation with clear and complete documentation.

3.1 Formula *Bonneville* and *Kyalami*

Our services are offered in simple, transparent formulas at attractive prices. General terms and conditions apply (see separate document in German).

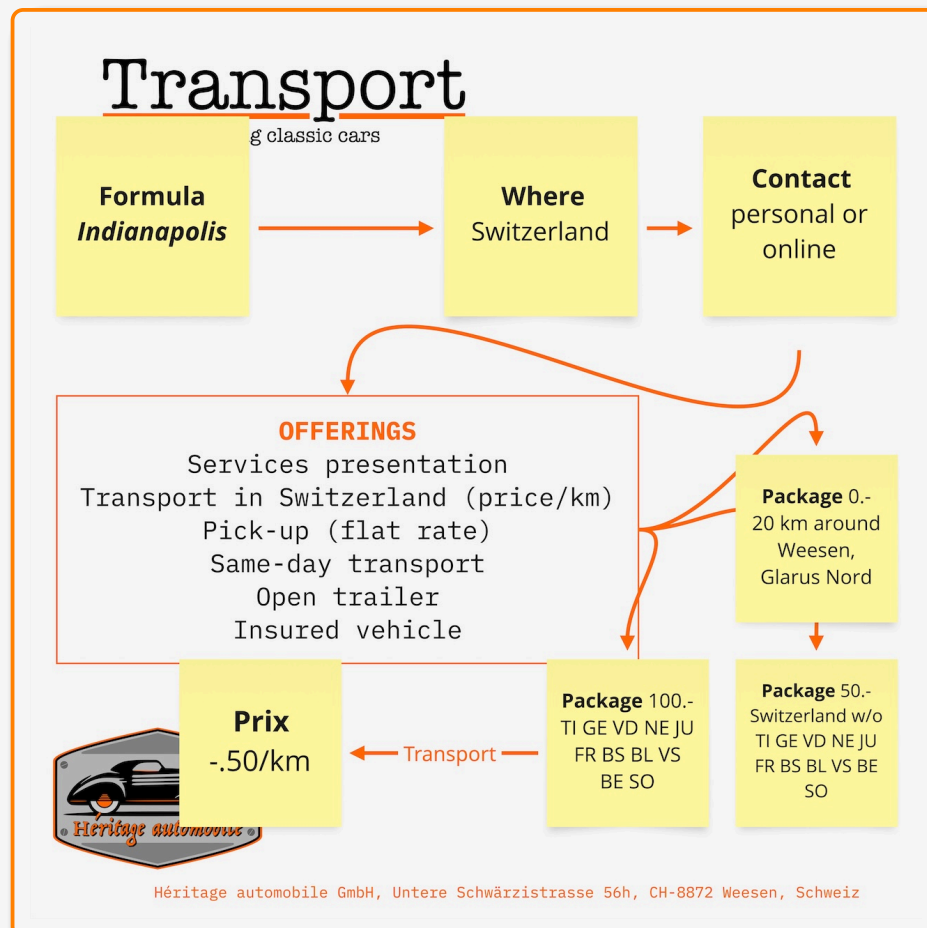

Two formulas are available. The formula *Bonneville* takes place in our premises in Weesen. It offers the advantage of being able to use our well-equipped garage for this type of work. The second, *Kyalami*, is carried out where the vehicle is located, implying a price scheme depending on your location and/or the one of the concerned vehicle.

4 TRANSPORT

Our transport service ensures that your prized vehicle arrives at its destination in the same condition it left your premises. Whether you are moving a car across town or to a different canton, we provide a tailored, white-glove service designed to be flexible and therefore to meet your needs.

Our trailer is an open, two-axle Brian James T4 Transporter, being good for an overall weight of 3500 kg, i.e. allowing cars up to 2500 kg. The tow truck is a 2021 Ford Ranger. All loads are insured during the transport. Due to long access ramps, we can also transport sport and race cars.

4.1 Formula *Indianapolis*

Our services are offered in simple, transparent formulas at attractive prices. General terms and conditions apply (see separate document in German).

The formula *Indianapolis* takes into account both the pick-up cost, with a flat rate depending on the pick-up place, and the actual transport, with a variable rate depending on the traveled distance.
